How To Edit

Replace using Photoshop Smart Object

Replace your design by Photoshop smart object layer is easy and simple to use. You just need a couple of click. Make sure you're using latest version of Photoshop. CS5 or later should work fine for this purpose.

Pic: Layer Panel

*double click on this 3D layer marked area. This will open a new window.
Paste your design on this new window, close window and click on save changes
This will automatically replace your design and wrap around the object.*

*Chnage Background Color:
Double click on this layer and select your color*
