## SOURCES:

I've used the following images, icons or other files as listed.

Fonts: Arial (default)

» Recommended: Download 140 pro fonts for \$25 at <http://www.font140.com>

## PSD:

I've included one psd with this theme:

1 PSD file with two folders - one for front, one for the back. Layered text and images.

To change the brown background simply navigate to the Photoshop layer named 'Bg', you can change the colour/gradient used and the water will still match accordingly.

The 'Divide' layer is the thin orange line between the white bar and top part of the card whilst the 'White btm' layer gives us a nice block of white on which the slogan sits.

This template is very easy and requires no further help information; if you are new to Photoshop I recommend:

## PRINTING:

Be sure to do these things to save you time and money on business card printing:

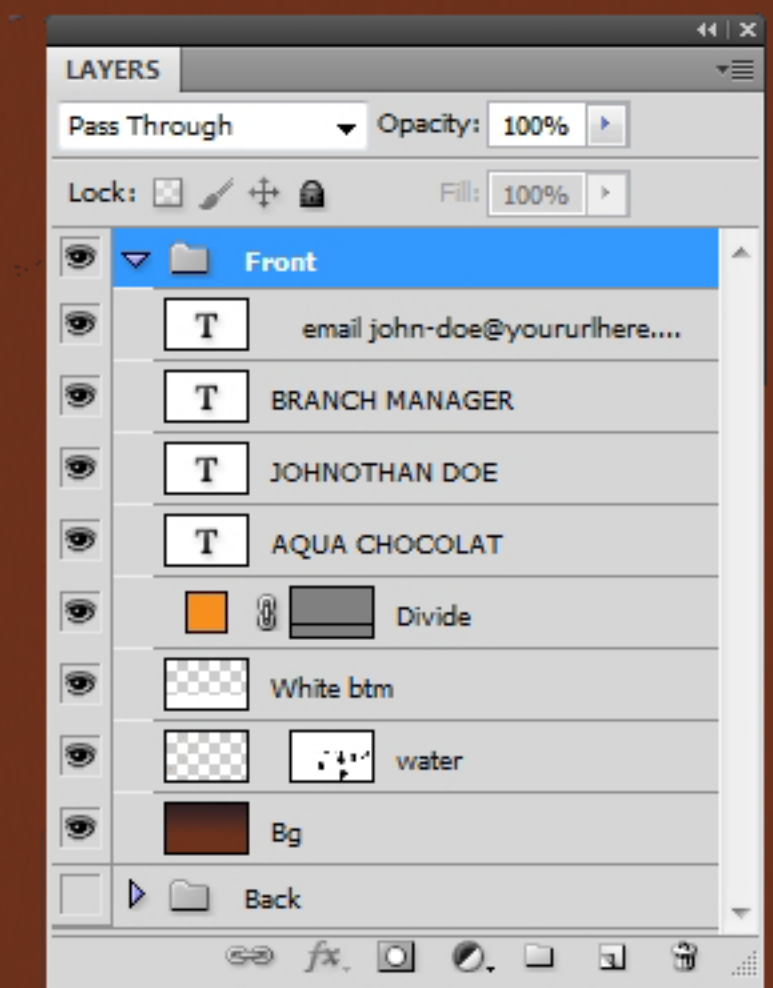

1. The business card must be in CMYK format
2. Your business card printing company may use a different size from the standard - check with them
3. Always print a rough copy from your own Printer before sending to your preferred printing company
4. Rounded corners are a cutting feature offered by printing companies and not a design feature

RobbyDesigns recommends [Vistaprint.com](http://Vistaprint.com) for all of your printing requirements.
