

Step by Step edit guide

Ripper Paper Instagram Stories

step 1

Download and install the fonts

The fonts used on the templates are free. You can download them here:

Playfair Display: <https://fonts.google.com/specimen/Playfair+Display>

TUESDAY NIGHT: <https://www.pixelsurplus.com/freebies/tuesday-night-free-signature-script>

Please install the fonts after downloading them.

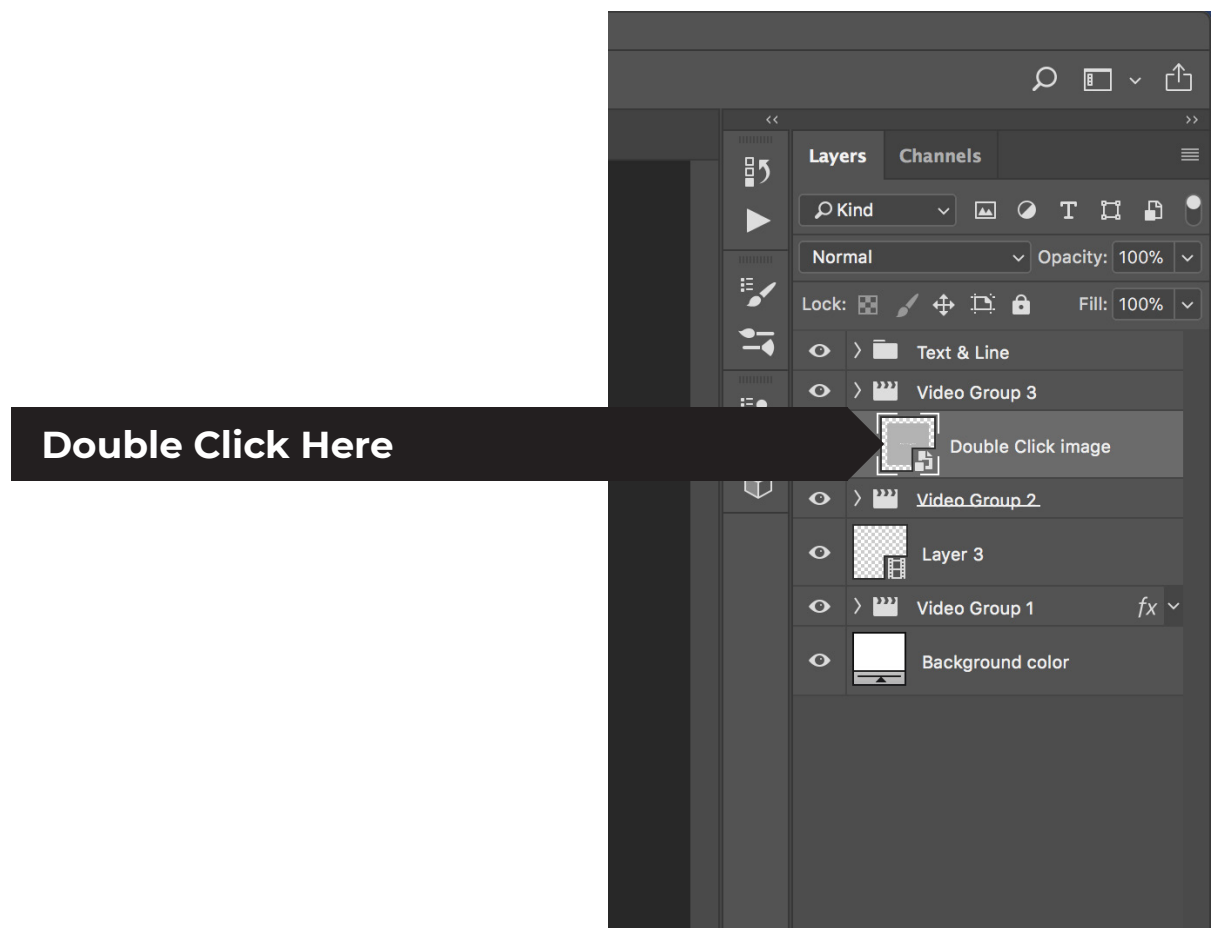

step 2

Change the images

To replace a sample image with your own, find the layer marked in red named “photo”. **Double click** on the **layer thumbnail**.

A new document will open on Photoshop. Just copy and paste your image on that document, or simply **drag and drop** from your desktop or folder.

Close that new document, say yes to **save changes**, and your image will be automatically placed on the main file!

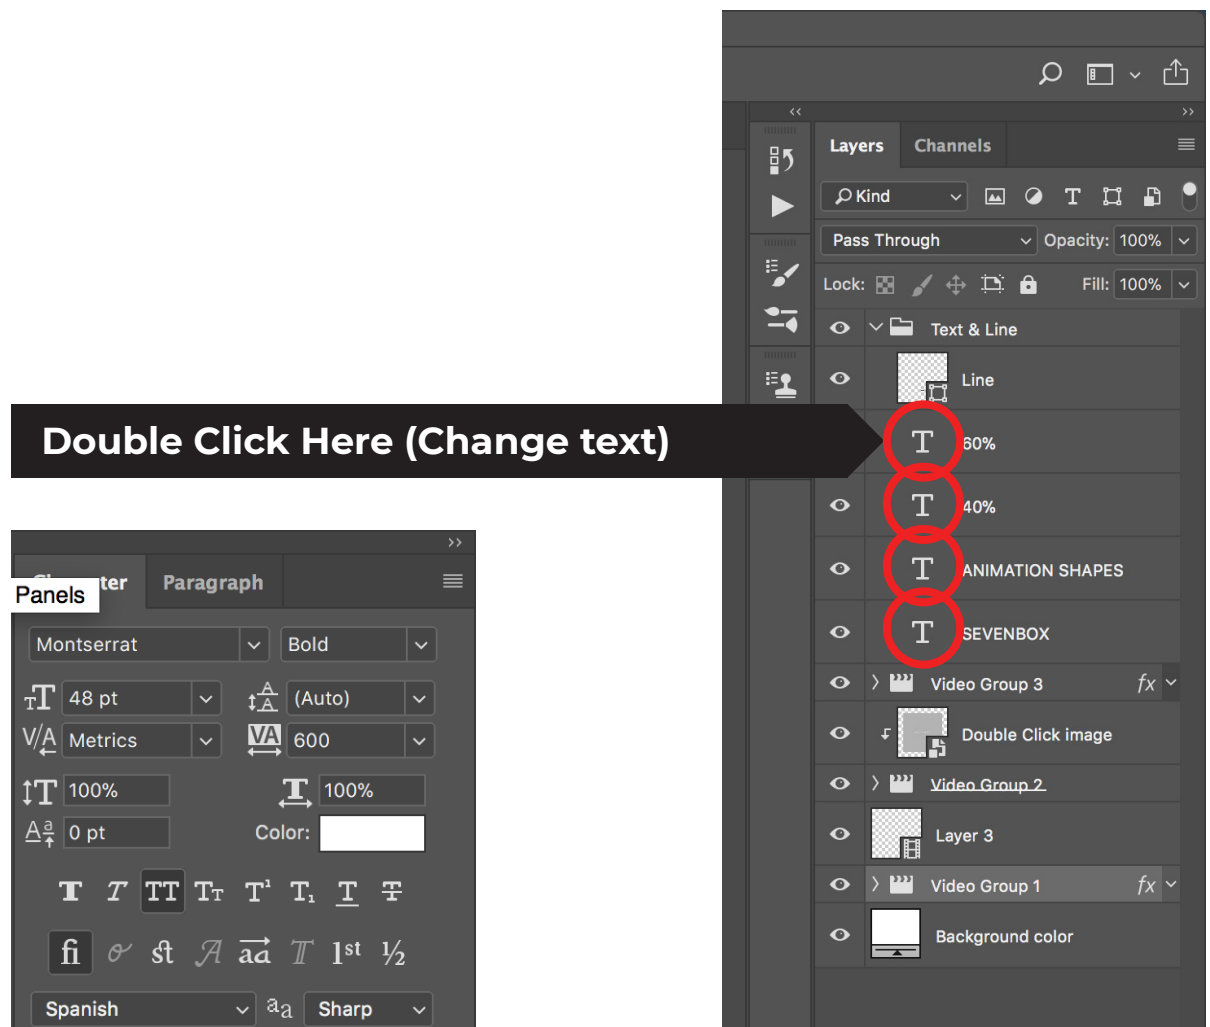

step 4

Edit the text

To edit the text, **double click** on the desired **layer thumbnail**, that will select the text. Simply start writing your own words. Don't forget to edit the **website URL**!

To change the font, size or color of the text go to **Menu / Window / Character**. If the text doesn't fit on the area, you can decrease or increase its size on that window.

Enjoy!

Thank you for purchasing!
