How to change the design

1. Open the .psd file inside Photoshop
2. On the Layers palette locate the smart layer named “Doubleclick to change design”. Doubleclick on layer thumbnail to open the smart object container (.psb file)
3. Inside the .psb file, hide or delete the placeholder design then drop your own work in place.

How to change the bonbon colour

1. Open the .psd file inside Photoshop
2. On the Layers palette locate the smart layer named “Doubleclick to change bonbon colour”. Doubleclick on layer thumbnail to open the smart object container (.psb file)
3. Inside the .psb file, change the colour of the masked layer or drop a pattern or an image on it.

Special advice

If you are changing the bonbons to darker colours, they might appear to light to you in the result

1. Open the „Bonbon“-groups
2. Locate the smart layers named “Doubleclick to change bonbon colour”.
3. Select layer and change the blending mode from „color“ to „color burn“

Moving bonbons around

1. Choose a „Bonbon“-group and press „cmd + t“ to re-arrange the whole group wherever you want
2. Locate the layer named “Contact Shadow” and re-arrange it so that it looks realistic to you.
3. All the other drop-shadows will re-arrange automatically

The bonbon wrapper has an additional drop-shadow that you can activate if you want

1. Open the „Bonbon“-groups
2. Locate the smart layers named “Doubleclick to change design”.
3. Open the fx-menu and active the hidden drop-shadow

Have fun and enjoy!
