

Jupiter Blogger Template Documentation

The Template was designed by SoraTemplates

- Email: soratemplate@gmail.com

Header (green colored):

1- Top Nav:

A- Top Menu widget: click "Edit" then start filling the fields with the appropriate data (Name and URL).

B- Social Profiles widget: click "Edit" and fill in the fields as in the picture below.

New Site Name	<input type="text" value='<i class="fa fa-facebook"></i>'/>
New Site URL	URL of your Facebook profile/page here
Add Link	

In the "New Site Name" field replace the word "facebook" with any social media website (twitter, youtube, google-plus, etc...).

Note: keep in mind that this template uses the "Font Awesome" service for the icons.

Follow this link for the complete set of icons this service provide: "<http://fontawesome.github.io/Font-Awesome/icons>".

3- Main Nav:

Click "Edit" and a new window will appear. Fill in the fields as in the picture below.

New Site Name	Insert Anything Here (Home, Technology, etc)
New Site URL	URL here
Add Link	

Now what if you want a mega menu? that is easy to do. Look at the picture below.

New Site Name	Insert Any Label Name (technology, business, food, etc)
New Site URL	mega
Add Link	

All you have to do is to insert a label name in the first field (New Site Name field) and the word "mega" in the second field.

Slider (red colored)

Slider

Slider
HTML/JavaScript Gadget

Edit

Click "Edit" then you have two options to enter in the **Content** box:

- no: If you don't want The Slider to show on your website, all you have to do is to type "no" (without the quotes).
- [recent]: The Slider will show the most recent posts (pay attention to the square brackets).
- A label name: The Slider will show the most recent posts of this specific label name (Note: keep in mind that label names are case sensitive. So for example "tech" is not the same as "Tech" or "TECH").

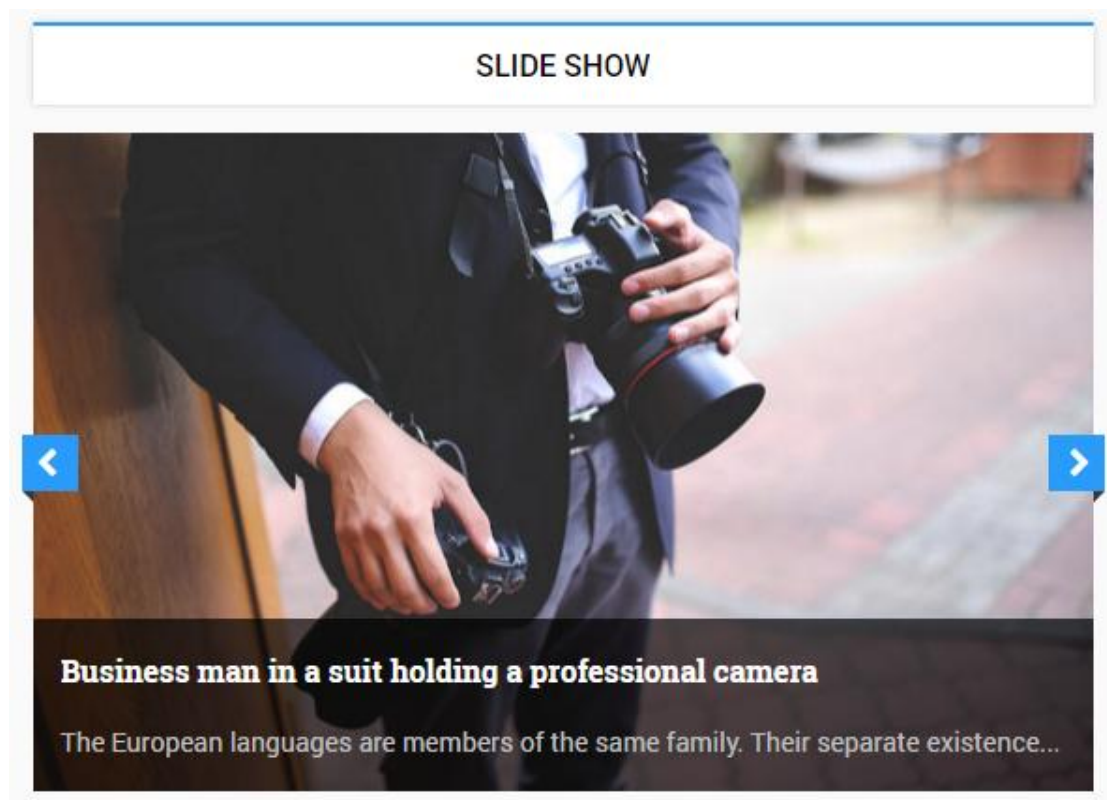

Home Widgets (blue colored)

Click on "Add A Gadget" then choose "HTML/Javascript".

This template have 4 home boxes/styles to choose from. These are "slideshow", "stack", "grids" and "btop".

Here is how each box looks like:

1- slideshow:

2- stack:

This classic car is really hard to find these days

Sed ut perspiciatis unde omnis iste natus error sit voluptatem accusantium doloremque...

A Beginner's Guide to the Types of Motorcycles

Hello World, The European languages are members of the same family. Their separate...

3- grids:

Business man in a suit holding a professional camera

How to publish your first book in less than 2 months

All you need to know about social media advertising

Facebook has collected web browsing habits to target ads

4- btop:

Nutrition Facts And Analysis For Strawberries

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean commodo ligula eget dolor. Aenean massa. Cum sociis natoque penatibus et ma...

The 20 Most Weight Loss Friendly Foods on The Planet

All types of teas and their health benefits for humans

Healthy recipes and ideas for light and healthy meals

What food you and your family eat for a healthy life

Here is how you can setup the above homepage widgets:

[label name][one of the boxes/styles mentioned above]

For example: [technology][slideshow]

Look at the following pictures:

Configure HTML/JavaScript

Title

Remove

Configure HTML/JavaScript

Title

vehicles

Content

b *i*   | Rich Text

[cars][stack]

Save

Cancel

Remove

Note: you can change the default number of posts for the homepage boxes/styles as follows:

1- Go to your template dashboard then click on "Template" then "Edit HTML".

2- Click anywhere inside the window that shows the HTML content then press "ctrl + f" and search for "slideshowPostsNum = 5". After that change the number 5 to any number you want.

Note: You will find the settings for the other boxes/styles in the same place (stackPostsNum, gridsPostsNum, btopPostsNum).

How to change/add author profiles:

1- Go to your template dashboard then click on "Template" then "Edit HTML".

2- Click anywhere inside the window that shows the HTML content then press "ctrl + f" and search for "<div class='author-info'>".

Here is a screenshot of how the "author info" section looks like:

```
<div class='author-info'>
  <b:if cond='data:post.author == &quot;Sora Templates&quot;'>
    <div class='clearfix'>
      <img class='author-avatar' expr:src='data:post.authorPhoto.url' />
      <h5 class='author-name'><data:post.author/></h5>
      <p class='author-bio'>replace this text with your own biography text</p>
    </div>
    <div class='author-footer clearfix'>
      <ul class='author-profiles'>
        <li class='profile-item'><a class='profile-anchor' href='#'><i class='fa fa-facebook' /></a></li>
        <li class='profile-item'><a class='profile-anchor' href='#'><i class='fa fa-twitter' /></a></li>
        <li class='profile-item'><a class='profile-anchor' href='#'><i class='fa fa-youtube' /></a></li>
        <li class='profile-item'><a class='profile-anchor' href='#'><i class='fa fa-google-plus' /></a></li>
        <li class='profile-item'><a class='profile-anchor' href='#'><i class='fa fa-dribbble' /></a></li>
        <li class='profile-item'><a class='profile-anchor' href='#'><i class='fa fa-linkedin' /></a></li>
      </ul>
    </div>
  </b:if>
</div>
```

Now, if you are the only one who is posting in your blog, then you only have to do the following:

1-Change the name of the author (which is Sora Templates as you can see in the picture above).

2-Change the author-bio to your own biography.

3-Change the social media profile links by replacing the "#" in the "href" attribute to your own social media links.

If you have multiple authors, then all you have to do is to copy and paste all the above code that is shown in the picture above (copy and paste by the number of other authors that write in the blog).

So for example if you have 3 authors then you have to have 3

blocks of the above code (copy and paste 2 times). After that, you can change the info for each author.

The Pagination

This template have a pagination widget like the one you see in the demo (look at the picture below):

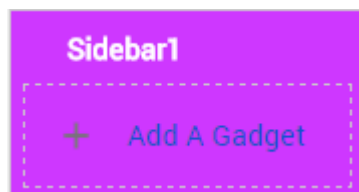

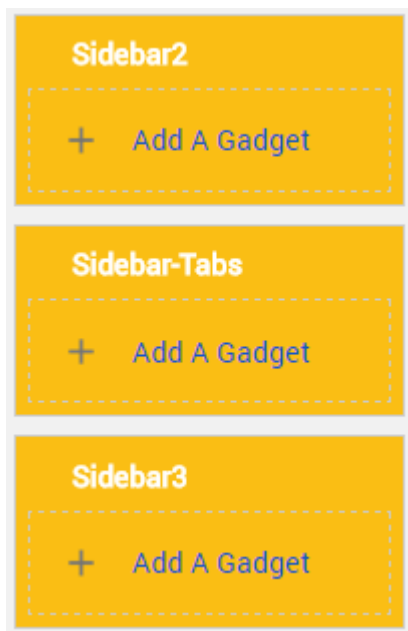

If you want to use it you have to search for " showPagination = false" and change "false" to "true". But keep in mind two things:

1- You can't use the pagination if you have more than 10000 posts (ten thousand posts).

2- For the pagination to work properly and without any problems you shouldn't have two or more posts that were published in less than one minute, and you shouldn't publish two or more posts in less than one minute (in other words, you must have a gap of at least 1 minute between each post and the other). I know that it's unusual and rare to publish two or more posts in the same minute but I had to warn you about that so you don't face any problems.

Sidebars (Purple & Orange colored)

This template have 6 custom sidebar widgets:

- Social Counter
- Recent Posts
- Random Posts
- Slide show
- Vertical Posts
- Recent Comments

Here is how you can setup each of these widgets:

1- Social Counter: Click on "Add A Gadget" then choose "HTML/Javascript". In the **Content** area insert the following:

[socialcounter]

[social media website name][link for social profile][any number]

Look at the following picture:

Title

we are social

Content

b *i*   | Rich Text

```
[socialcounter]
[facebook][#][544268]
[twitter][#][544268]
[youtube][#][544268]
[google-plus][#][544268]
[rss][#][544268]
[dribbble][#][544268]
[instagram][#][544268]
[pinterest][#][544268]
[linkedin][#][544268]
```

Save Cancel Remove

Just replace the # with the link of your social profile. The picture above explains everything and it also contains the social media profiles that you can choose from.

2- Recent Posts: Click on "Add A Gadget" then choose "HTML/Javascript". In the **Content** area you have to insert the following:

recentposts1 or recentposts2

Look at the pictures below.

Title

recent posts

Content

b *i*   | Rich Text

recentposts1

Save

Cancel

Remove

Title

recent posts

Content

b *i*   | Rich Text

recentposts2

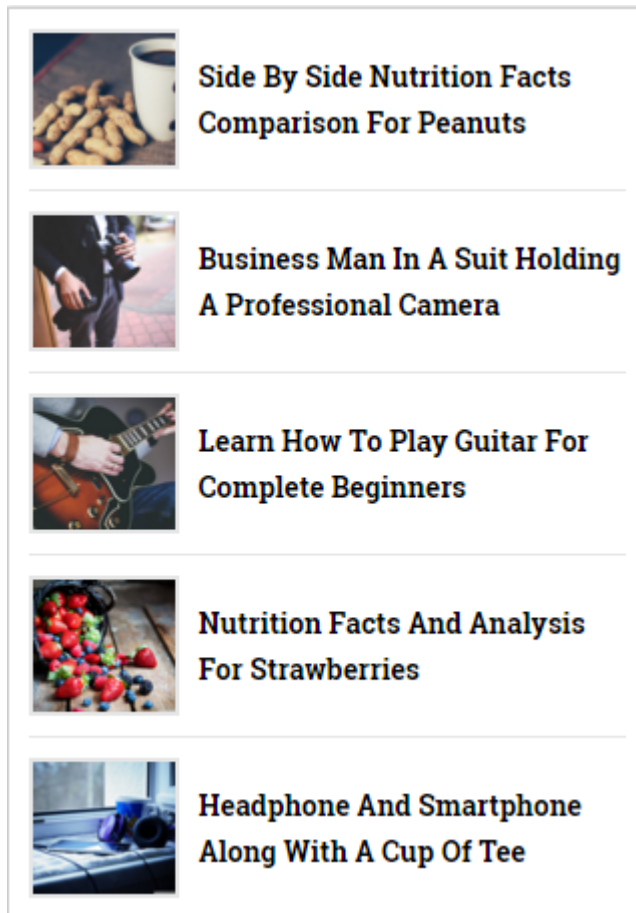

Save

Cancel

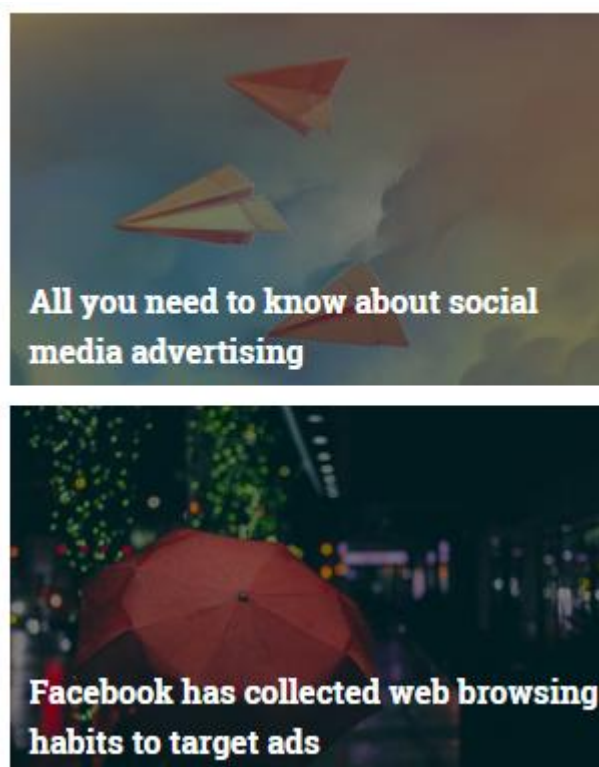

Remove

3- Random Posts: Click on "Add A Gadget" then choose "HTML/Javascript". In the **Content** area insert the following:
randomposts1 or randomposts2

If you choose "recentposts1" or "randomposts1" your posts will look like the following picture:

And if you choose "recentposts2" or "randomposts2" your posts will look like the following picture:

Note: The default number of posts that will be shown by the "recent posts" and "random posts" widgets is 5. To change that you can search "sidebarRecentPostsNum = 5" or "sidebarRandomPostsNum = 5". Change the number "5" to anything else.

4- Slide show: Click on "Add A Gadget" then choose "HTML/Javascript". In the **Content** area insert the following:

[slideshow][any label you want]

Example: [slideshow][technology]

Look at the picture below:

Configure HTML/JavaScript

The screenshot shows the 'Configure HTML/JavaScript' gadget configuration window. It has a 'Title' field at the top. Below it is the 'Content' area, which includes a rich text editor toolbar with icons for bold (b), italic (i), link, and unlink, followed by the text 'Rich Text'. The content area contains the text '[slideshow][technology]'. At the bottom of the window are three buttons: 'Save' (orange), 'Cancel' (grey), and 'Remove' (grey).

And here is how the slide show looks like in the sidebar:

Note: The default number of posts that will be shown by the "slideshow" widgets is 5. To change that you can search "slideshowPostsNum = 5". Change the number "5" to anything else.

5- Vertical Posts: Click on "Add A Gadget" then choose "HTML/Javascript". In the **Content** area insert the following:

[verticalposts][any label you want]

Example: [verticalposts][food]

Look at the picture below:

Configure HTML/JavaScript

Title

Content **b** *i*   | Rich Text

`[verticalposts][food]`

Save Cancel Remove

Note: The default number of posts that will be shown by the "verticalposts" widgets is 5. To change that you can search "verticalPostsNum = 5". Change the number "5" to anything else.

6- Recent Comments: Click on "Add A Gadget" then choose "HTML/Javascript". In the **Content** area insert the following:

Configure HTML/JavaScript

Title

Content **b** *i*   | Rich Text

`recentcomments`

Save Cancel Remove

Note: The default number of posts that will be shown by the "recentcomments" widgets is 5. To change that you can search "sidebarRecentCommentsNum = 5". Change the number "5" to anything else.

**** Important Note:** In sidebar1 (colored in purple) the only custom widget you can use is the "vertical posts" widget.

Footer (grey colored)

In the footer you can choose the "recent posts widget" and "random posts widget" by following the same steps mentioned in the Sidebar section. And you can change the default number of posts that will be shown by these two widgets by searching for "footerRecentPostsNum = 4" or "footerRandomPostsNum = 5".

Note: You can change the blog layout from Box to Full-width by searching for "boxStyle = true" and change true to false.

Happy Blogging!
